

ASSIGNMENT 4

DOCKER AND KUBERNETES

1. Pull an image from Docker hub and run it in Docker Playground:

2.Create a IBM container registry:

The screenshot shows the IBM Cloud Container Registry interface. The left sidebar contains navigation links: Container Registry, Quick start, Namespaces (1), Repositories (0), Images (0), Trash (0), and Settings. The main content area is titled 'Namespaces' and shows a table with one namespace named 'giftyannie13' in the 'Default' resource group. The table columns are Name, Resource group, Repository count, Image count, and Retention policy. A 'Create' button is visible in the top right corner.

Name	Resource group	Repository count	Image count	Retention policy
giftyannie13	Default	0	0	

3.Create a Kubernetes cluster in IBM cloud:

The screenshot shows the IBM Cloud Kubernetes Clusters page for a cluster named 'mycluster-free'. The left sidebar contains navigation links: Overview, Worker nodes, Worker pools, and DevOps (New). The main content area shows a table with one worker node. The table columns are Name, Status, Worker pool, Zone, Private IP, Public IP, and Version. A 'Kubernetes dashboard' button is visible in the top right corner.

Name	Status	Worker pool	Zone	Private IP	Public IP	Version
000000c5	Normal	default	Milan 01	10.144.228.104	159.122.175.170	1.24.7_1543
